Summary

Senior Software Engineer with backend specialization of 7+ years of experience designing, building, and operating production web services using Node.js, TypeScript, AWS, PostgreSQL, and DynamoDB. Experienced in event-driven systems, API design, automated testing, CI/CD, cloud cost optimization, and production support. Led products from architecture through launch, resolved complex concurrency issues, and improved deployment reliability for distributed remote teams.

Skills

- **Backend:** Node.js, Javascript, Typescript, Fastify, Express, Go, REST, GraphQL
- **Cloud and infrastructure:** AWS Lambda, ECS, SQS, SNS, S3, AppSync, Firehose, Glue, Athena, Cognito, API Gateway, Docker, CI/CD
- **Data:** PostgreSQL, MySQL, DynamoDB
- **Quality and operations:** Jest, Playwright, integration testing, observability, production support

Experience

Platform Software Engineer

[Viyahe](#) / [Monark](#)

Remote, PH 03/2022 – 07/2026

- Contributed to the **core development** of [trials.gg](#), a challenge-based reward system for competitive gamers, from initial architecture to production launch.
- Led end-to-end delivery of [trials.gg](#) (architecture → production), scaling to **900+ sign-ups** with **~5 hrs/day average engagement** and **99.9%** availability.
- Led the design and development of the **data analytics pipeline on AWS**, ingesting **~100 events/day**; enabled near real-time dashboards from **Grafana**.
- Owned **CI/CD pipelines** using **AWS CodePipeline** across frontend and backend; increasing release cadence to **~5 deploys/week**.
- Volunteered to support **frontend delivery** (2023–2024) as a Platform Software Engineer; shipped **35+ web/Electron features** and **enhancements**, helping maintain release cadence on a lean team.
- Enforced **clean code architecture and team-wide coding standards**, improving long-term maintainability.

DevOps Consultant (Freelance)

[PH Live Music LTD](#)

Remote, PH 03/2025 - 05/2025

- Reduced **infrastructure cost** by **~70%** through AWS migration and **cost optimization** (right-sizing, eliminating unused resources).
- **Implemented CI/CD automation**, cutting pipeline runtime from **~20min** → **~6min** and enabling **~2 deploys/week** with a pipeline failure rate under **7%**.
- Resolved **Typescript** integration/build issues (typing, module resolution, bundler config), stabilizing CI and **improving release reliability**.
- Implemented **security measures** to protect web platforms against vulnerabilities.

Senior Software Engineer Consultant (Freelance)

[MDI Novare](#)

Remote, PH 09/2021 - 10/2023

- **Led the BFA module team** for Meralco's Bayad Center project, guiding the module's technical design, backend development, testing, and delivery.
- **Designed and implemented backend features** using **AWS services**, translating project requirements into **production-ready solutions**.
- Developed and maintained **integration tests** for each new feature, strengthening regression protection and release confidence.
- **Mentored developers** through code reviews, technical discussions, and guidance on engineering standards and project-specific requirements.
- Investigated and resolved application defects, improving **system stability** and the overall user experience.
- Conducted **knowledge-transfer sessions** and supported the project through final delivery and handover to Meralco.
- Retained through **successive freelance contract renewals** until the project was fully delivered to the client.

Deputy Head Software Developer

[exact construct GmbH](#)

Zamboanga, PH 08/2019 - 03/2022

- **Led engineering standards** and **developer mentoring** through code reviews, technical training, and guidance on best practices.
- Designed and delivered web applications using **React**, **Express**, and **GraphQL**.
- Owned development infrastructure and **GitLab CI/CD pipelines** across multiple projects, and maintaining production servers.

Education

Bachelor of Science

[Western Mindanao State University](#)

Zamboanga, PH

- Computer Science Major in Information Technology
